TES LOGIKA ARITMATIK

Dalam Tes ini terdapat 10 soal, dengan cara memilih jawaban A, B, C, D dan E di lembar Jawaban.

PILIH LAH SALAH SATU JAWABAN YANG PALING TEPAT

- Diketahui barisan aritmatika dengan $U_1 + U_{10} + U_{19} = 96$, Suku Ke-10 barisan tersebut sama dengan :
A. 22
B. 27
C. 32
D. 37
E. 42
- Suku keempat dan suku ketujuh suatu baris aritmatika berturut turut adalah 17 dan 29, suku barisan kedua puluh lima adalah :
A. 99
B. 100
C. 105
D. 110
E. 115
- Jumlah dua kali sisi samping dengan sisi depan suatu segitiga siku siku adalah 24 cm. dengan menggunakan model matematika dalam fungsi kuadrat, maka nilai terbesar untuk luas segitiga tersebut adalah :
A. 36 cm^2
B. 32 cm^2
C. 30 cm^2
D. 28 cm^2
E. 24 cm^2
- Sebuah benda sumbu siku-siku x dan y dengan titik pusat O , dengan sumbu $x+$ ke arah timur $y+$ ke arah utara, diputar dengan titik O sebagai pusat putaran ke arah lawan jarum jam. Sehingga sumbu $x+$ lama dengan sumbu $y+$ baru dengan sumbu $y+$ lama?
A. 90
B. 45
C. 70
D. 290
E. 170
- Seorang pelajar memperoleh nilai-nilai 91, 88, 86 dan 78 untuk empat mata pelajaran. Berapa nilai yang harus diperoleh untuk mata pelajaran ke lima agar dia memperoleh nilai rata-rata 85 :
A. 81
B. 80
C. 83
D. 82
E. 87

6. Seorang pelajar ingin membuat benda persegi panjang dari seutas tali yang panjangnya 30 cm, berapa luasnya :
- A. **56.25 cm²** D. 48.05 cm²
B. 54.25 cm² E. 48.25 cm²
C. 50.05 cm²
7. Jika y rupiah dibagi merata n orang, setiap orang akan memperoleh bagian Rp. 60.000,- =
Jika seorang lain bergabung pada kelompok di atas dan jika y rupiah dibagi merata, setiap
orang sekarang memperoleh Rp. 50.000,0. Berapa rupiahkan y ?
- A. **3.000.000,-** D. 300.000
B. 2.500.000,- E. 250.000
C. 500.000,-
8. Seorang wanita dibayar Rp. 800,- perjam saat bekerja. Dia bekerja dari pukul 8.00 sampai
pukul 16.00. Dia akan dibayar tambahan 50% perjam untuk selewatnya pukul 16.00. Jika
dia memperoleh bayaran Rp. 8.000 pada hari itu, pukul berapa dia pulang :
- A. 19.30 D. **17.10**
B. 18.40 E. 21.20
C. 11.00
9. Seorang pedagang sayur menjual dagangannya dengan harga Rp. 80.000,- dan
memperoleh laba 25 % dari harga beli. Berapakah harga beli.
- A. 110.000 D. 180.000
B. 196.000 E. **120.000**
C. 264.000
10. Persamaan fungsi kuadrat yang melalui titik titik (0. -6), (-1, 0), dan (1, -10) adalah :
- A. **f(x) = X² - 5X - 6** D. f(x) = X² - 2X - 3
B. f(x) = X² + 5X - 6 E. f(x) = X² - 6X - 5
C. f(x) = X² - 5X + 6

TES PERSAMAAN KATA

Dalam Tes ini Anda dinilai kemampuannya mengartikan arti dari satu kata. Pilihlah satu jawaban yang bermakna sama atau paling mendekati kata yang dicetak dengan huruf besar.

PILIH LAH SALAH SATU JAWABAN YANG PALING TEPAT

1. GANCU

- A. Golok
- B. Timbangan
- C. Karung
- D. Serokan
- E. Pengait

2. JENGALA

- A. Hutan
- B. Lebat
- C. Sabana
- D. Gurun
- E. Bukit

3. HOSTES

- A. Pramusyahwat
- B. Pramuria
- C. Pramuniaga
- D. Pramusaji
- E. Pramugari

4. CITRA

- A. Cinta
- B. Gambaran
- C. Pembersih kulit
- D. Perlambang
- E. Cita rasa

5. MODIFIKASI

- A. Perombakan
- B. Perbaikan
- C. Penyempurnaan
- D. Pengurangan
- E. Penambahan

6. SABAN

- A. Pernah
- B. Sejalan
- C. Jarang
- D. Tiap-tiap
- E. Sekali

7. TASIK

- A. Lembah
- B. Danau
- C. Rawa
- D. Selat
- E. Sungai

8. ENTITAS

- A. Kualitas
- B. Sumbangsih
- C. Wujud
- D. Jumlah
- E. Tak terbatas

9. HIBRIDASI

- A. Penyuburan
- B. Penyilangan
- C. Peristirahatan
- D. Penjaringan
- E. Unggulan

10. BOGA

- A. Pemutusan
- B. Pencabutan
- C. Pengurangan
- D. Perlumbangan
- E. Makanan

TES LAWAN KATA

Dalam Tes ini Anda dinilai kemampuannya mengartikan arti dari satu kata, dan kemudian mampu mencari lawan kata atau lawan arti dari kata tersebut.

PILIH LAH SALAH SATU LAWAN KATA DIANGGAP BENAR

1. BERSIMBAH
A. Kusut
B. Kering
C. Gersang
D. Bebas
E. Bertahan
2. TERKATUNG
A. Melayang
B. Pasti
C. Ombak
D. Terperosok
E. Terbenam
3. PROPOSISI
A. Konklusi
B. Raksi
C. Persepsi
D. Posisi
E. Proposis
4. PROMINEM
A. Terkemuka
B. Pendukung
C. Biasa
D. Setuju
E. Pelapor
5. REVOLUSI
A. Eksklusif
B. Nepotisme
C. Polusi
D. Kolusi
E. Evolusi
6. SPORADIS
A. Jarang
B. Sering
C. Kadang-kadang
D. Pernah
E. Tak pernah
7. SEKULER
A. Ilmiah
B. Duniawi
C. Rokhaniah
D. Keagamaan
E. tradisional
8. UNIVERSAL
A. Parsial
B. Maksimal
C. Setengah
D. Multiversal
E. Dunia
9. YUANA
A. Janda
B. Tua
C. Yatim
D. Kakak
E. Kembaran
10. MAKAR
A. Tidak Jujur
B. Adil
C. Terkendali
D. Aman
E. Jujur

TES BAHASA INGGRIS

SECTION 1 : READING COMPREHENSION AND VOCABULARY

This section is designed to measure your ability to read and understand short passages similar in topic and style to those that students are likely to encounter in North American universities and colleges. This section contains reading passages and questions about the passages.

Leonardo da Vinci was born on April 15, 1452 in Vinci, Italy. He was the illegitimate son of Ser Piero, a Florentine notary and landlord, but lived on the estate and was treated as a legitimate son. In 1483, Leonardo da Vinci drew the first model of a helicopter. It did not look very much like our modern day “copter,” but the idea of what it could do was about the same.

Leonardo was an artist and sculptor. He was very interested in motion and movement and tried to show it in his art. In order to show movement, he found it helpful to study the way things moved. One subject he liked to study was birds and how they flew. He spent many hours watching the birds and examining the structure of their wings. He noticed how they cupped air with their wings and how the feathers helped hold the air. Through these studies, Leonardo began to understand how birds were able to fly.

Like many other men, Leonardo began to dream of the day when people would be able to fly. He designed a machine that used all the things he had learned about flight, and thus became the first model of a helicopter.

Poor Leonardo had only one problem, however. He had no way to give the necessary speed to his invention. You see, motors had not yet been invented and speed was an important part of the flying process. It would be another four hundred years before the engine was invented and another fifty years before it was put to the test in an airplane. Leonardo’s dream of a helicopter finally came to pass in 1936.

The Italian painter, sculptor, architect, engineer, and scientist, Leonardo died on May 2, 1519, and was buried in the cloister of San Fiorentino in Amboise.

1. The word **problem** in paragraph four could best be replaced by the word:

- a. **dilemma**
- b. mistake
- c. danger
- d. pain

2. What is the author’s main point?

- a. **The invention of the helicopter.**
- b. Birds cup air with their wings and use feathers to help hold the air.
- c. An overview of one of Leonardo da Vinci’s many skills.
- d. Leonardo da Vinci was born in 1452 and died in 1519.

3. The word it in paragraph two refers to:
 - a. Leonardo da Vinci
 - b. The first model helicopter
 - c. 1483
 - d. motion and movement**

4. Which paragraph explains why Leonardo's helicopter was not successful in his lifetime?
 - a. paragraph 1
 - b. paragraph 2
 - c. paragraph 4**
 - d. paragraph 5

5. The word illegitimate in paragraph one is closest in meaning to:
 - a. against the law or illegal
 - b. not in correct usage
 - c. incorrectly deduced; illogical
 - d. born out of wedlock**

6. The following sentence would best complete which paragraph? "Since then people have been living out Leonardo's dream of flying."
 - a. paragraph 3
 - b. paragraph 4**
 - c. paragraph 5
 - d. paragraph 2

7. What was the main problem with Leonardo's invention?
 - a. motors were not yet invented**
 - b. the birds lost their feathers
 - c. he was illegitimate
 - d. he couldn't draw

8. The word they in the second paragraph refers to:
 - a. the feathers
 - b. the birds**
 - c. the studies
 - d. the wings

9. In what year was the first helicopter flown?
 - a. 1483
 - b. 1452
 - c. 1519
 - d. 1936**

10. What two things did birds have that Leonardo da Vinci noticed helped them to fly?
- wings and beaks
 - feathers and talons
 - wings and feathers**
 - cups and feathers
11. The word thus in the fourth paragraph could best be replaced by:
- Hence**
 - After
 - Unsuitably
 - Inappropriately

For centuries, people have searched for a way to replace dead and decaying teeth with comfortable false teeth. Many materials have been used to make a set of false teeth. The teeth themselves should be made from a hard and durable material. They should be secured to a soft material, making them easy to wear. In the last two decades, dentists succeeded in making durable false teeth that are comfortable, too. Two thousand years ago, the Etruscans made teeth out of animal bone and gold.

These materials were used-with varying degrees of success-up to the 1700's. When George Washington was president, ivory from animals such as elephants became a popular material for false teeth. Doctors and inventors also tried silver, pearl, and agate, but teeth made from these materials were very expensive. Perhaps the most successful material was porcelain, invented by a Frenchman about two hundred years ago. White, strong, and resistant to decay, porcelain is still used today for making single teeth.

Besides finding a material for the teeth, inventors also had to find a way to secure them in a person's mouth. People tried wire, springs, and many kinds of glue to accomplish this. In most cases, however, discomfort and a likelihood of the teeth falling out plagued the person who wore them. Around 1844, an American dentist named Horace Wells used laughing gas to put people to sleep before working on their teeth.

This innovation made dental work a lot less painful. Soon after, an inventor created the first form of rubber. This was important to dentistry because teeth could be attached to the rubber, and the rubber could be molded to fit the shape of the mouth. With these two developments, dentist could work without causing pain and could fit teeth more carefully. False teeth have become more available and comfortable since then, and dentists have continued to improve the making and use of false teeth.

12. What is the main topic of this passage?
- Horace Wells
 - False teeth**
 - Gold and bone
 - The Etruscans

13. The word they in the first paragraph refer to:
- Teeth
 - Materials
 - People
 - Dentists
14. The word varying in the second paragraph cold best be replaced by the word:
- Constant
 - Changeless
 - Fluctuating
 - Stable
15. Porcelain was invented after the first use of:
- Rubber for holding for holding teeth in place
 - Laughing gas
 - Ivory for making teeth
 - Electric drills
16. When did Horace Wells begin using laughing gas?
- 1700
 - Two-thousand years ago
 - 1834
 - 1844
17. The word besides in the third paragraph means:
- In addition to
 - Stand next to
 - Anyway
 - Together
18. The word them in the third paragraph refers to:
- Teeth
 - Inventors
 - People
 - Wire
19. When was rubber found to be a useful material for false teeth?
- After laughing gas was used to put patients to sleep
 - While George Washington was president
 - Before a Frenchman invented porcelain
 - While the Etruscans were making teeth of bone and gold

- 20 The following sentence would best complete which paragraph? "It is unimaginable what will come next."
- Paragraph 1
 - Paragraph 2
 - Paragraph 3
 - Paragraph 4**
21. The word molded in the fourth paragraph means:
- Formed into a shape**
 - To form an organic growth
 - To make an ornament
 - The fitting of a shoe
22. The word resistant in the second paragraph could best be replaced by the word:
- Prone**
 - Insusceptible
 - Hearty
 - Sassy

The lens on a camera has only two tasks. First, it must gather in as much light as possible in order to activate the sensitive chemicals on the film. Second, it must organize the light rays so that they form a sharp image on the film. These may sound like simple tasks, but they are not.

One of the sharpest lenses is merely a pinhole in a sheet of cardboard, metal, plastic, or a similar material. If the pinhole is tiny enough, the image can be quite sharp, but then very little light is admitted. For most purposes, even the most sensitive film would take too long to record an image.

A glass lens is much better because it lets in much more light and focuses it on the film. Yet simple glass lenses are sharpest only in their centers. As more of the lens is used, the image suffers in sharpness. One reason a simple lens can cause problems is that it is shaped like a section of a sphere. Spherical lenses do not focus perfectly on flat film, so the image is slightly distorted, especially at the edges. Another reason is that the lens can act partly like a prism. This means that some of the colors in the image will not focus properly, and the image will be fuzzy.

One solution is to block off all but the sharp-focusing center of the lens. If you block off the edges of the lens, however, less light will get to the film. Early lenses had to compromise between sharpness and light-gathering power. Very sharp lenses that admit as much light as possible can be built by making them with several separate lenses, or elements. A multiple-element lens has from two to nine separate lenses. Some elements are cemented together, and some have a gap between them. Furthermore, the elements are often made of different kinds of glass, each with a different ability to bend light rays. Some of the elements are there just for correcting problems caused by the other elements! The results are worth it, though: pictures can be taken in many different light conditions, and they have a sharpness you can almost feel.
